KWANTUNG INDUSTRIAL COMPANY REBUILDS AND REORGANIZES

It is also planned to establish a tooth-powder factory in connection with this plant to utilize the powder which is one of the plant's by-products.

The Kwang-ho Machine Shops of the Kwantung Industrial Company are to be combined into one factory in the former plant of the Mo-fan Ironworks. All the various ironworking shops comprising the Kwang-ho machine shops such as the I-hua and the Tungchiu shops will be combined. When the reorganization is completed, there will be a vice shop, casting plant, machine plant, rivet shop, offices, storehouse, and club room. An assembly hall 40 meters by 16 meters, and a dormitory for technicians in training will also be built.

The Kwang-yan Oil and Fat Company of the Kwantung Industrial Company is now starting repair work. In preparation for large production, they are cleaning and repairing all the large and small steam pipes and oil pipes and expect to finish the work before the end of 1948. Simultaneously, they plan to install equipment for soap manufacture, with regular production to begin in March 1949.
